

# BISCD 0944 : Biomedical Imaging

This course covers various forms of clinical and research-grade microscopy. The format will consist of a weekly one hour lecture and a two and a half hour lab exercise (hands-on experience with compound, fluorescence, confocal, and electron microscopes, as well as computer programs for image analysis).

**Credits** 3.0

**Prerequisites**

[BISCD 0552](#) Fundamentals of Research or prior course director approval.
